# Plastifloor® Cleanser for tools

**Application:**     Plastifloor®-cleaner is a solvent, which is able to solve hardened methacrylate resins, because of its aggressive solvent power.

**Characterization:** Plastifloor®-cleaner is a low boiling solvent with very good solvent power. It is easy inflammable. It is suitable for cleaning of tools and dirty construction units. Always check on the stability of the materials that should be cleaned. Plastifloor®-cleaner is **NOT** suitable for the thinning of Plastifloor® accelerator resins. Clean your equipment before hardening, if possible.

**Cleanser-basis:**   - Plastifloor®-cleaner acetone based
- Plastifloor®-cleaner ethylacetate based
- Plastifloor®-cleaner MMA-based

**Safety – hints:**   Plastifloor®-cleaner is low boiling and easy inflammable.
(A I). There should always be good ventilation at processing Avoid unconditionally flames, smoking and sparking by tools since the steam – air – mixtures can explode.
